Transformational Speaker | Certified Business Coach  
Trainer | CEO of IROC Marketable Business Solutions

## SPEAKER BIO

Cori Fonville Foster is the owner and CEO of IROC MBS. She has always had a passion for others, but in her early professional days that took the shape of working in the medical field. After complications of a rare, disabling eye condition, Cori decided to try her hand at starting her first small business. While developing her business she saw a gap in services for those newer small business owners that really had great products and services but didn't have the funds or capital to scale up their businesses like the bigger businesses. This birthed IROC MBS, a space for small business owners wh have a success mindset but need affordable solutions.

Over the past few years, IROC MBS has been able to help small business owners across America and Canada. Entrepreneurs are able to feel empowered and scale up their businesses to 6 and 7 figures.
